Causes Count analyzed 72,478 California nonprofits (50,000 of which are all or nearly all volunteer) and gathered input from 3,000+ nonprofit leaders and individuals across the state.

Key findings from the study indicate that California nonprofits:
- Generate the majority of their revenue through programs and fees
- Contribute 15% to the Gross State Product (GSP)
- Are the 4th largest private employer by industry in the state
- Employ a racially diverse and younger workforce
- Have fewer resources in Southern California
- Operate in the black or at break even 70% of the time
- Mobilize 25% of the state’s residents as volunteers
- Are trusted more than for-profits to create jobs, reflect community values, and work on the public’s behalf.

This regional profile provides specific, local information drawn from Causes Count data sources. What’s unique about the Far North Region? It is home to 3% of the state’s population, 4% of its nonprofits, and 2% of its total nonprofit revenue. Notably, this region ranks second among the 10 regions in contributions (which includes grants and gifts) as a source of revenue.

### Far North* Nonprofit Regional Profile

**Total** mutual, public & societal benefit internationals human services, health, other hospitals, education, other, environment, health, other, human services, international, mutual, public & societal benefit

**42,012** Employees

As reported by all 501(c)(3) public charities filing IRS Form 990. Does not include religious organizations.
